

frames

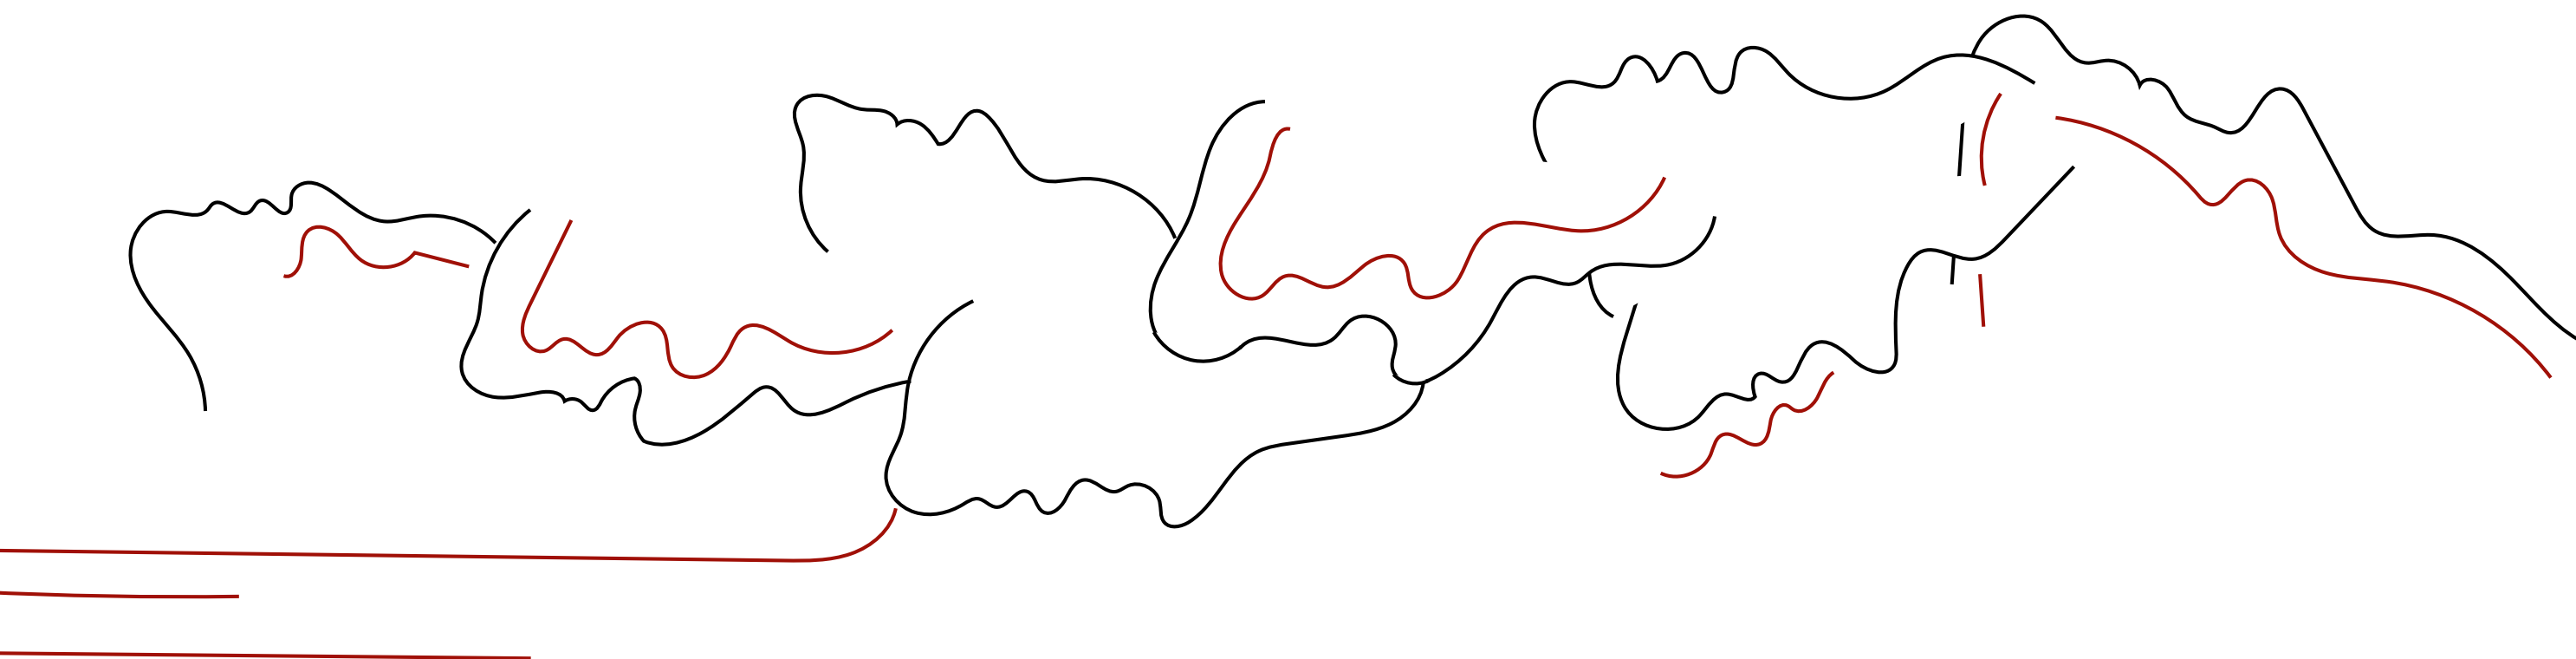

frames

Fenia Kyratzi

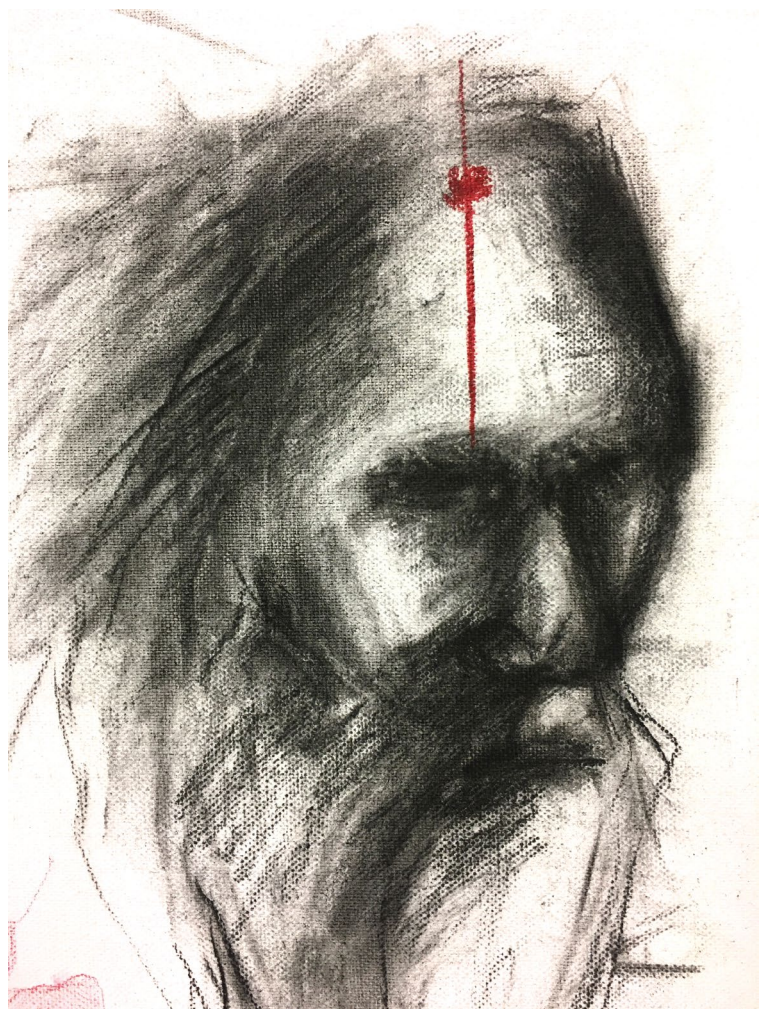

This portfolio focuses on the uniqueness of every human being. On the beauty that each person has behind the “frames”, which represent all the unreachable societal standards, all the boundaries that we set to remain trapped in our so-called safe zones.

This is a collection of pieces to remind oneself of life’s unfiltered craziness and freedom, of the beauty that can be found in the simplest of moments. This collection is also there to remind us of the need to be our authentic selves, unfiltered and often non-conforming to societal ideals.

characters

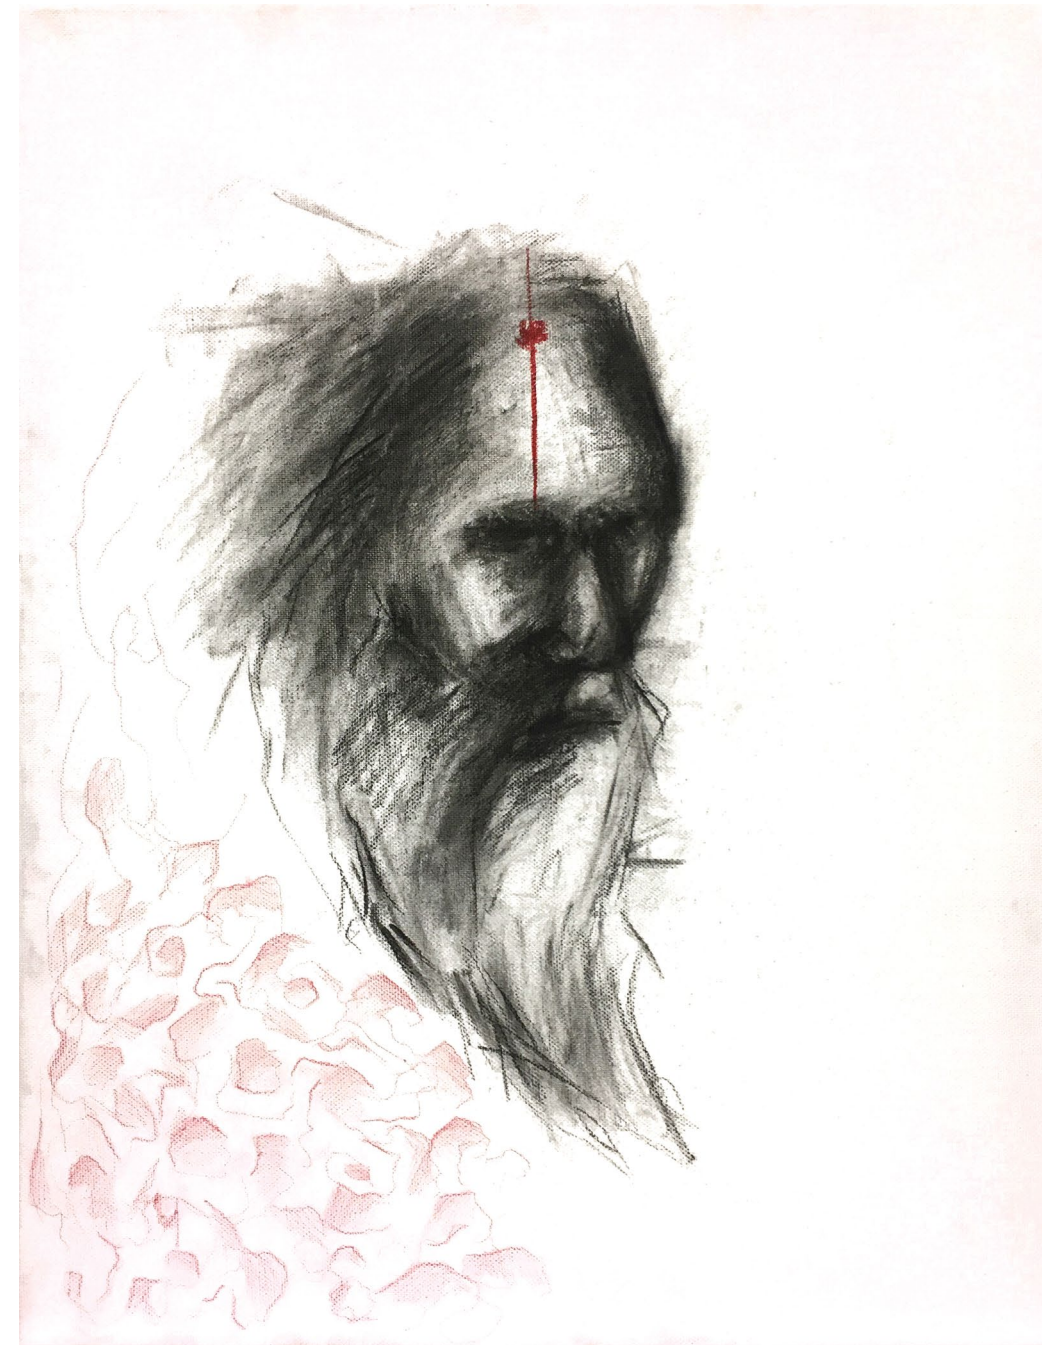

This unit demonstrates the everyday protagonists of life, each one of them possessing a different story, coming from a different background.

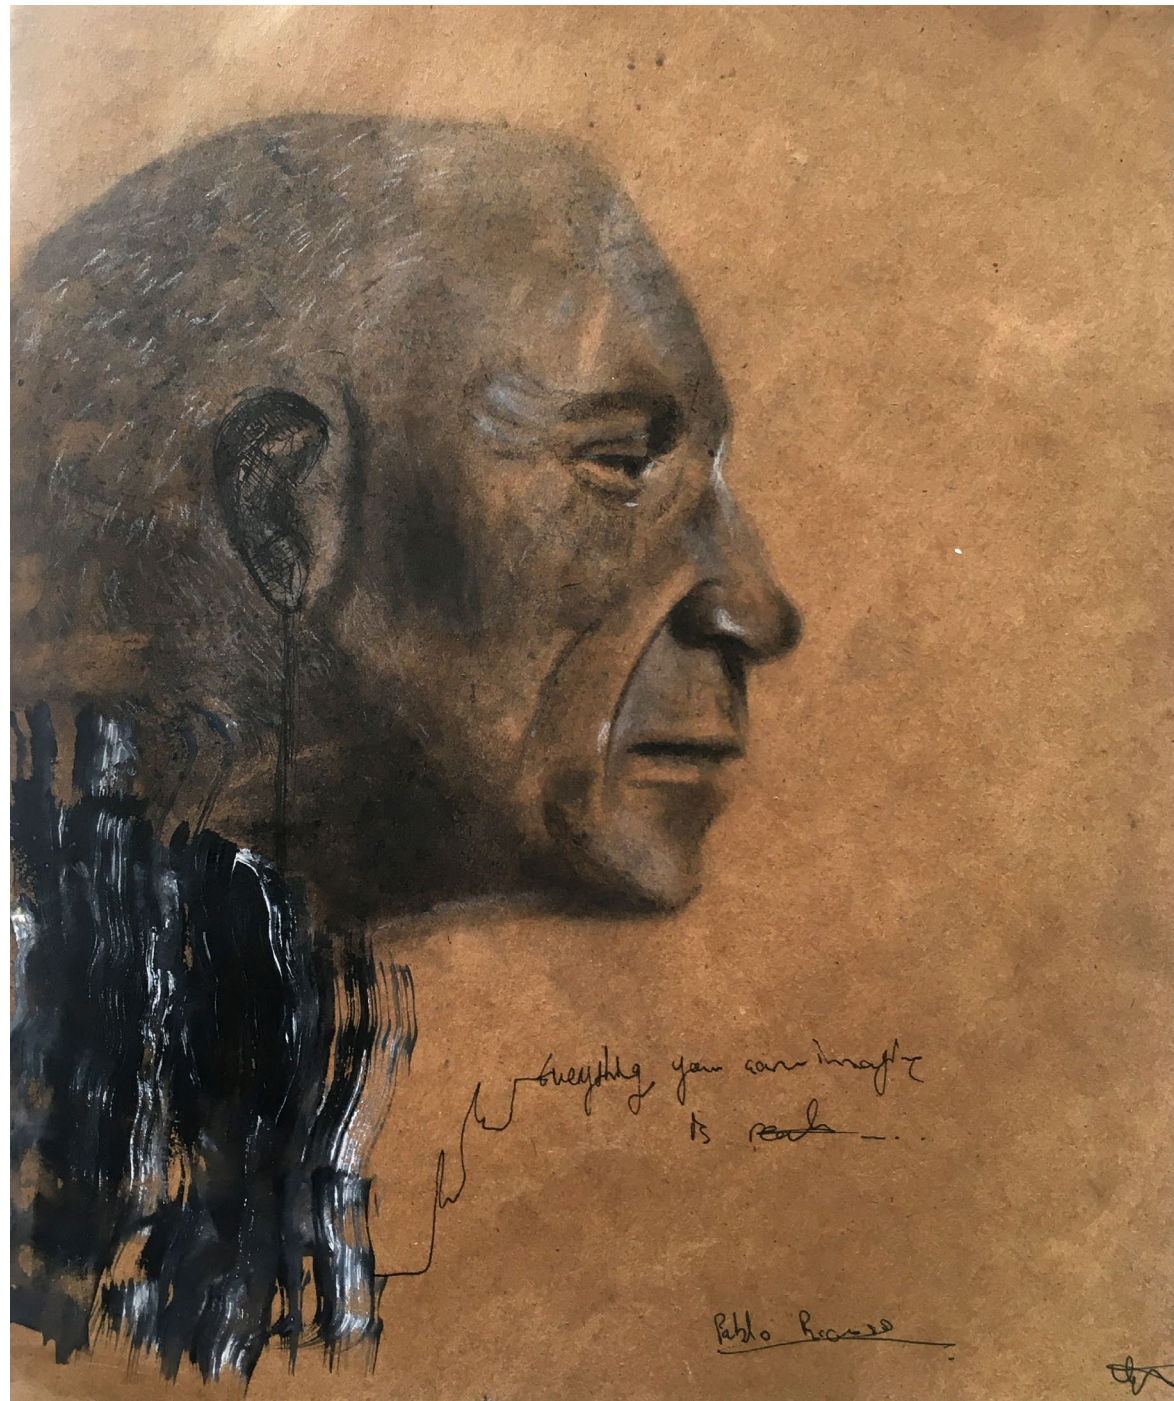

detail

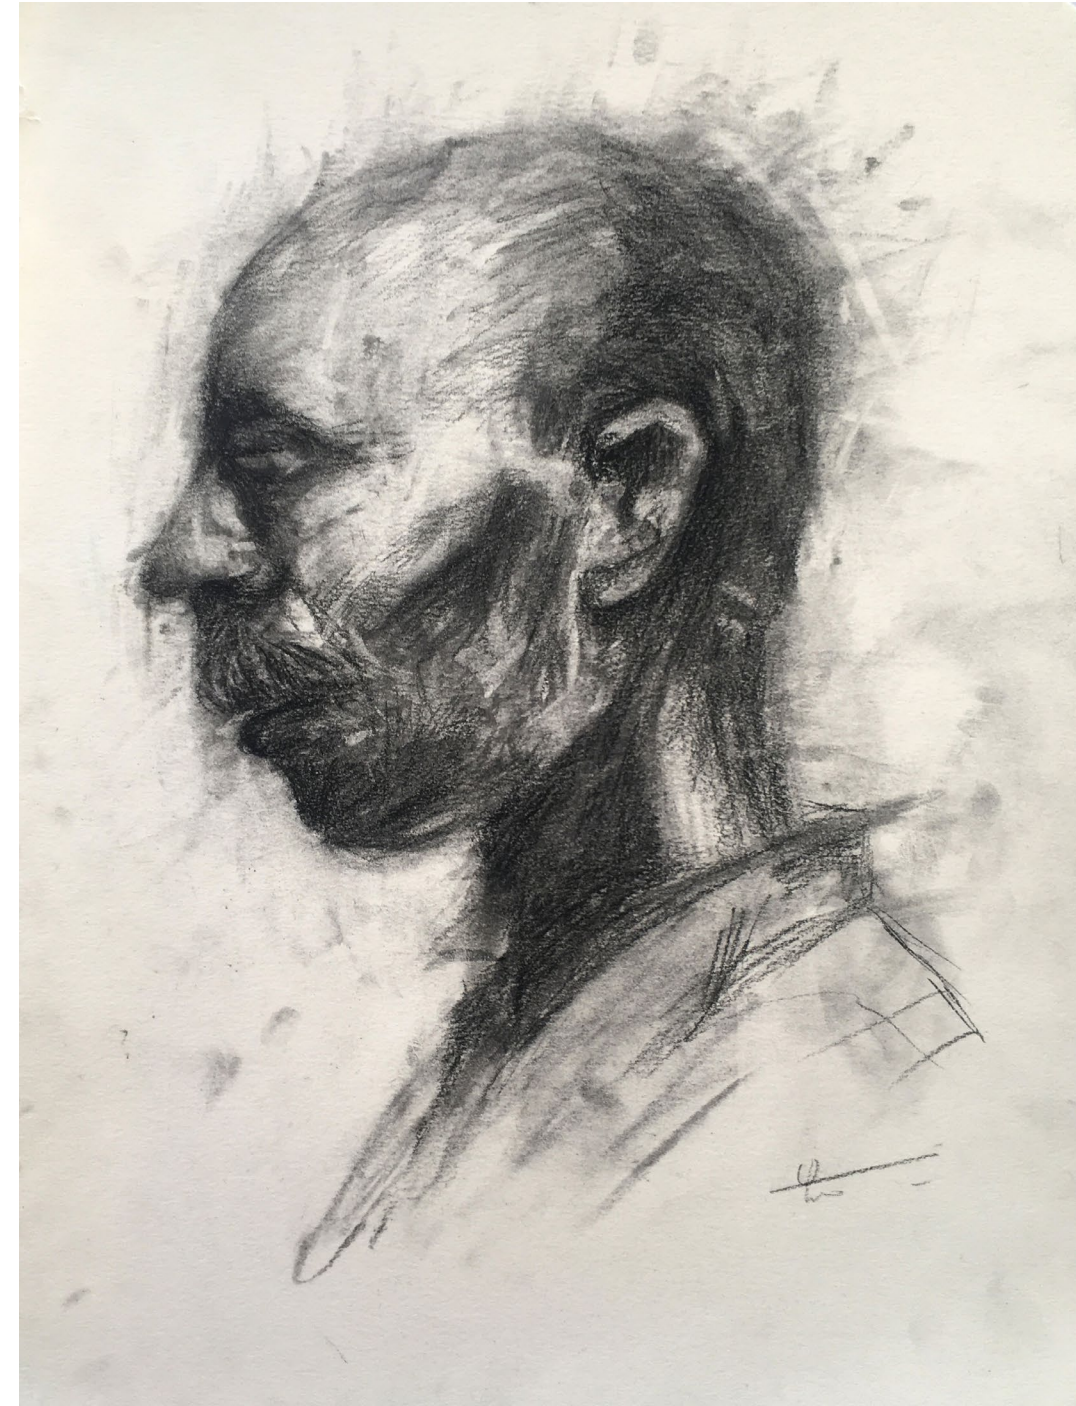

Focus on the marks that we even sometimes put to our own selves in order to hide our true flowers and to live up other's expectations.

shine

This unit shows the beauty found when one digs below the surface, behind the "frame". Photographs, paintings filled with glitter, moves and innovative collages depict people's raw, authentic sides, beautiful when present, yet usually hidden behind societal expectations.
